

Harmony SASE for MSSPs

Boost your security portfolio with Secure Access Service Edge

In today's evolving landscape, the shift towards remote and hybrid work, coupled with the increasing adoption of cloud services, drives the need for robust, scalable, and unified security solutions. SASE (Secure Access Service Edge) is the ideal solution as it integrates multiple security functions into a single, cloud-native service, simplifying management and reducing costs, presenting a significant opportunity for Managed Security Service Providers (MSSPs). The SASE market is set to exceed \$16 billion by 2027, with a compound annual growth rate of 24%. By adopting SASE, MSSPs can navigate sophisticated threats, offer additional services, attract new clients, and maintain competitiveness in the fast-evolving cybersecurity market.

SASE is expected to capture **15%** of the combined SD-WAN and cloud security market by 2027.

Key Features:

Converged Security:

All-in-one ZTNA, SWG, and FWaaS with cross-platform policies and zero trust architecture.

Robust Performance:

50+ globally distributed Points of Presence (PoPs) with an SLA-backed backbone for minimal latency and high availability.

Easy Integration:

Seamless integration with SIEM, IdP, EDR/XDR, and RMMs/PSAs, ensuring enhanced visibility and control across your network.

Harmony SASE Key Benefits for MSSPs

NFR Licenses

Empower your team to become Harmony SASE experts. Receive 10 NFR licenses when you become a partner. These licenses can be used for standard external sales demonstrations or customized demonstrations.

Campaign in a Box

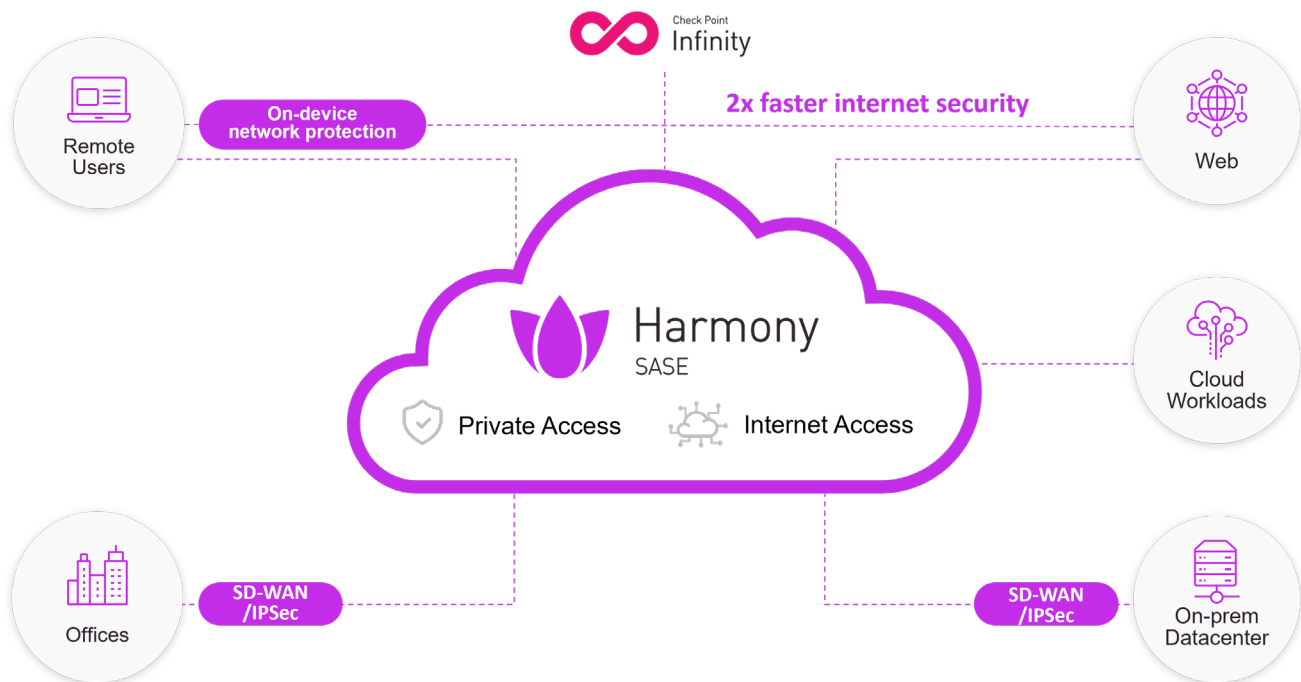

Access ready-to-use marketing assets promoting the benefits of Harmony SASE. Simply add your logo to these premade assets to run effective email campaigns and social media promotions.

Sales and Technical Training

Our training provides partners with a better understanding of our technology to increase customer satisfaction and achieve continual revenue growth. Complete it and share all your success on LinkedIn and other social platforms with our official badge.

Take Advantage of 24/7 Support

Check Point is dedicated to making sure MSPs succeed. Should issues arise, the Check Point support team can assist you at no extra cost.

Harmony SASE integrates advanced network security functions with WAN capabilities, guaranteeing secure, uninterrupted access to applications, data, and services anytime, anywhere. By leveraging cutting-edge technologies like ZTNA, secure web gateways, firewall-as-a-service, and cloud-based security, Harmony SASE sets a new standard for seamless, robust protection in today's fast-paced digital environment.
