

MANAGED THREAT COMPLETE ESSENTIAL

Unlimited DFIR and built-in ROI from a true security partner

As the attack landscape evolves, organizations continue to seek the partnership of Managed Detection and Response providers – the market is expected to more than triple in size over the next 7 years¹. And it's not only because of the stubborn skills shortage and the difficulty of retaining talent.

The fact is, cybercrime is relentless. Threat actors are more advanced, with new ways to bypass security controls. As the attack surface expands, so do risks – and not just from active threats, but from unaddressed vulnerabilities that attackers seek to exploit. That's why Managed Threat Complete incorporates vulnerability management, giving a true picture of risk to prioritize what matters most before turning into a breach.

This around the clock, risk-aware monitoring of an organization's environment ensures that when the inevitable happens, there is no loss of business continuity, no tarnished reputation.

Simplify your security stack

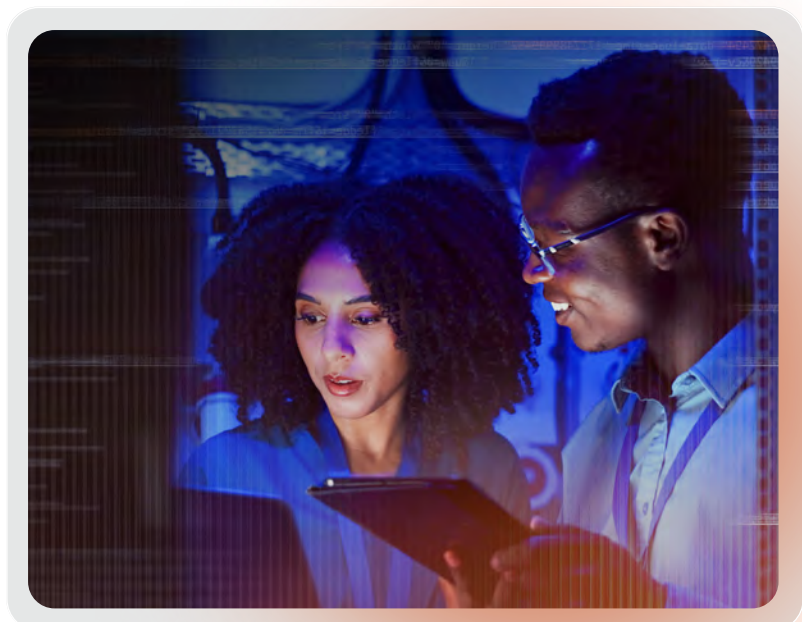

The average organization manages 83 security tools². No wonder Gartner, ESG, and every other thought leader has been talking about consolidation.

Managed Threat Complete Essential unifies core security functions into a single service: MDR is built upon Rapid7's next-gen SIEM with maximum transparency; it is enhanced through automated SOAR workflows and key vulnerability management capabilities; and it directly embeds unlimited, expert-led incident response. Every threat – across endpoint, network, identity, and cloud – is investigated and responded to, while proactive threat hunting keeps your program ahead of the latest attacker TTPs.

This is consolidation with impact: fewer tools, tighter coverage, and clearer outcomes.

Essential capabilities

Complete attack surface coverage

Consider us an extension of your team. We're here to help you secure your environment with XDR coverage, not just respond to alerts.

Unlimited DFIR included

When something happens, we make sure you're covered. Custom IR Runbooks keep you prepared, Unlimited Incident Response keeps you secure.

Unlimited VM to uncover risks early

Unlock the power of proactive Vulnerability and Risk Management Scanning capabilities to make your D&R program efficient and effective.

Consolidate for powerful ROI

Consolidate tools and costs to focus on your security outcomes with the power of a 24x7 SOC, DFIR Experts, XDR, SIEM, EDR, SOAR, Threat Intelligence, and Unlimited VM in one service.

ABOUT RAPID7

Rapid7 is creating a more secure digital future for all by helping organizations strengthen their security programs in the face of accelerating digital transformation. Our portfolio of best-in-class solutions empowers security professionals to manage risk and eliminate threats across the entire threat landscape from apps to the cloud to traditional infrastructure to the dark web. We foster open-source communities and cutting-edge research—using these insights to optimize our products and arm the global security community with the latest in attacker methodology. Trusted by more than 11,000 customers worldwide, our industry-leading solutions and services help businesses stay ahead of attackers, ahead of the competition, and future-ready for what's next.
