

A partner guide to selling Adlumin

The Adlumin Security Operations Platform is a full-scale solution that empowers you to take command of your IT operations.

Adlumin enables organizations to get the capabilities of an enterprise security operations center in a single platform. Our Security Operations solution brings all your data sources into one location, provides a multi-layered detection approach, automates response action, includes threat intel and threat hunting, one-click compliance reporting, and more.

Adlumin Security Operations Platform and Managed Security Services

Protect Warranty Certification

Warranty for up to \$500,000

Key differentiators

Full-access to product

MDR customers have access to their data and visibility into what's being worked on from an investigative standpoint.

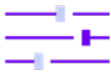

Vendor-agnostic approach

Connect to the technology customers have invested in across networks, endpoints, cloud, ticketing systems and more.

Security health insights

A simplified view of at-risk programs and policy violations and dives into user risk so customers always know the state of their security posture and areas to improve.

Centralized capabilities

Adlumin's feature-rich platform provides customers with SIEM, security orchestration, automation and response, perimeter monitoring, deception technology, threat intelligence, behavioral and machine learning detections, threat hunting, and more.

Reporting & compliance in a click

Customers have access to administrative, executive, and compliance reporting. They can schedule how often they'd like to receive the report or jump in at any time to see the stats.

Quick deployment

Our cloud platform comes configured and ready to go out of the box, including rules written by our Data Science team. Customers can be up and running in 90 minutes without hassle.

Target audience

Company size: 250-5000

Industry: We support various industries but find the most success in heavily regulated ones. Our top-performing industries include:

Financial
Services

Healthcare

Legal

Banking &
Credit Unions

Education

State and
Local

Finding the right customer fit

- ▲ Unhappy with current SIEM or MDR
- ▲ Looking for holistic view of environment
- ▲ Has multiple entities to monitor
- ▲ Invested in security technology like EDR
- ▲ Wants protection in cloud environments
- ▲ Seeking to mature security program

N-able fuels IT services providers with powerful software solutions to monitor, manage, and secure their customers' systems, data, and networks. Built on a scalable platform, we offer secure infrastructure and tools to simplify complex ecosystems, as well as resources to navigate evolving IT needs. We help partners excel at every stage of growth, protect their customers, and expand their offerings with an ever-increasing, flexible portfolio of integrations from leading technology providers. n-able.com
