# F

# FortiMail<sup>™</sup> For Email Security

### Highlights

- Protection against email-borne threats
- Validated performance
- Fabric-enabled email security
- Powered by FortiGuard Labs

## Powerful, Scalable Email Security Protection Available in an Array of Deployment Models

With best-in-class performance validated by independent testing firms, FortiMail delivers advanced multi-layered protection against the full spectrum of email-borne threats. Powered by FortiGuard Labs threat intelligence and integrated into the Fortinet Security Fabric, FortiMail helps your organization prevent, detect, and respond to emailbased threats including spam, phishing, malware, zero-day threats, impersonation, and Business Email Compromise (BEC) attacks.

Powerful anti-spam and anti-malware are complemented by advanced techniques like outbreak protection, content disarm and reconstruction, sandbox analysis, impersonation detection, and other technologies to stop unwanted bulk email, phishing, ransomware, business email compromise, and targeted attacks.

### Validated Performance

Fortinet is one of the only email security vendors to consistently prove the efficacy of FortiMail through independent testing. FortiMail earned a 99.99% Spam Catch Rate from Virus Bulletin.

#### Fabric-enabled Email Security

**Protection Against Email-borne Threats** 

FortiMail is integrated with Fortinet products as well as third-party components help you adopt a proactive approach to security by sharing IoCs across a seamless Security Fabric. It also enables advanced and complementary email security protection for Microsoft 365 and Google Gsuite Cloud email through API-level integration.

#### Powered by FortiGuard Labs

Fortinet FortiMail is powered by threat intelligence and FortiGuard Al-powered Security Services like antivirus, virus outbreak protection, and antispam, from FortiGuard Labs. With visibility across 600,000 customer environments worldwide, FortiGuard Labs is one of the preeminent threat research teams in existence.

### **Proactive Email Security**

FortiMail addresses the full spectrum of risks that email poses to organizations, fortified by FortiGuard Labs' global visibility and intelligence on the latest threats.

#### **Multi-Layered Anti-Spam**

Multiple sender, protocol and content inspection techniques shield users from spam and junk mail. Using a combination of reputation analysis, connection filtering, authentication and recipient verification methods allows for fast and accurate email protection. Checks include IP, domain, sender, SPF, DKIM, DMARC and geographical restrictions.

Finally, message structure and content are analyzed based on the digital signature, keywords in context, image analysis, embedded URIs, and more advanced techniques such as behavior analysis and spam outbreak protection. Working together, these techniques consistently identify and block a verified 99.99% of spam in real-world conditions.

Combining multiple static and dynamic technologies that include signature, heuristic, and behavioral techniques along with virus outbreak prevention, FortiMail protects against a wide

### **Powerful Anti-Malware**

### **Advanced Threat Protection (ATP)**

range of constantly evolving threats.

For an even stronger defense against the very latest threat classes like business email compromise and targeted attacks, FortiMail offers optional content disarm and reconstruction, sandbox analysis, sophisticated spoof detection, and more.

Integrated Data Loss Prevention

A robust set of capabilities for data loss prevention and email encryption safely deliver sensitive emails and protect against the inadvertent loss of data. These features facilitate compliance with corporate policies and industry regulations.

### **Intuitive Controls**

Real-time dashboards, rich reporting, centralized guarantine and simple to use end-user controls allow organizations to get running and realize value quickly. An intuitive user interface combined with flexible MTA and mail-handling capabilities give full visibility and control over email traffic.

#### Integration with the Fortinet Security Fabric

The future of email security is platform- or fabric-enabled to counter the growing sophistication of threats and multi-vector campaigns. As part of the Fortinet Security Fabric, Indicators of Compromise and other telemetry can be shared for enhanced security across your entire security infrastructure.

IT and security teams are able to more completely connect the dots to identify multi-vector campaigns by sophisticated actors. In addition, intensive and repetitive workflows including response can be automated to reduce the burden on security operations teams.

#### Industry Recognized, Top-Rated Performance

FortiMail delivers superior performance as measured by independent third-party testers.

99.99% Spam Catch Rate

100% Malware Detected

#### Intuitive Email Management

Real-time dashboards, rich reporting, centralized quarantines, and end user controls along with full MTA and mail-handling capabilities provide organizations full visibility and easy control over email traffic.

#### Easy-to-Use Configuration

Easy-to-use configuration controls make setting up and managing email security – even advanced security capabilities - easy for organizations of all sizes and use cases

### Hands on or hands off?

# Which FortiMail solution is best for you?

### We want full control.

Virtual Machines and appliances for teams who want total control over their infrastructure and email security.

### Manage it for us.

Email security as a service for teams who just want to focus on monitoring and responding to email threats. Fortinet handles the infrastructure.

Read the FortiMail Cloud data sheet >

### Features

### High Performance, Flexible Deployment

Scale easily to handle millions of messages per hour. Serving organizations of all sizes, Fortinet provides a wide range of deployment models and operation modes to best match your organization's email security needs.

### **Deployment Models**

#### **Appliances and Virtual Machines**

FortiMail appliances and virtual machines are for organizations that prefer full control and management over their email security infrastructure for on-premise and cloud use cases.

- Appliances for on-premise environments
- Virtual machines for running on:
  - Popular hypervisor platforms including:
    - VMWare
    - Citrix XenServer
    - Hyper-V
    - KVM
  - Major cloud platforms:
    - AWS
    - Azure
    - Google Cloud
    - Oracle
    - AliCloud

### FortiMail Cloud

FortiMail Cloud for organizations that want simple, easyto-use email security as-a-service for both on-premise and cloud-based email services.

#### **Operation Modes**

#### Gateway Mode

Provides inbound and outbound proxy mail transfer agent (MTA) services for existing email gateways. A simple DNS MX record change redirects email to FortiMail for analysis. FortiMail then relays safe email to its destination email server for delivery.

#### **Microsoft and Google Cloud Email API Integration**

FortiMail can be deployed out of line to simplify deployment, so no MX record change is required, and leverage the native Microsoft and Google APIs to deliver threat detection and post-delivery message clawback. Broad flexibility is possible with clawback to create policies that address compliance or unique business requirements, such as building search parameters based on keywords, file name, or content type. These capabilities can serve as powerful complements to native Microsoft and Google security features to bolster overall efficacy and reduce risk.

### **Transparent Mode**

Transparent mode eliminates the need to change the DNS MX record, or to change the existing email server network configuration. Transparent mode is particularly appealing for service providers that want to extend email security services to their customer bases. Not available with FortiMail Cloud.

#### Server Mode

The FortiMail device acts as a standalone messaging server with full SMTP email server functionality, including flexible support for secure POP3, IMAP, and WebMail access.

## **Feature Bundles**

We want	full control.				
Feature	Base Bundle	Enterprise Advanced Threat Protection Bundle	Ent. ATP with Cloud Email API Support Bundle		
99.99% Spam Capture Rate	$\bigcirc$	$\bigcirc$	$\bigcirc$		
Advanced Multi-Layer Malware Detection	$\bigcirc$	$\bigcirc$	$\bigcirc$		
Inbound and Outbound Filtering	$\bigcirc$	$\bigcirc$	$\bigcirc$

Scheduled Scanning of Microsoft and Google Mailboxes					
Post-delivery Clawback of Newly Discovered Email Threats			$\bigcirc$		

# **Additional Add-on Capabilities**

### Email Continuity

Email Continuity for FortiMail Cloud is designed to protect valuable productivity by providing emergency mailbox services when organizations experience an outage of their email services.

### Dynamic Image Analysis Service

Protects your organization and employees against inappropriate and sexually explicit images.

### **Integrations with Fortinet Solutions**

Fortilsolator

FortiNDR

FortiSandbox Cloud

### **Features Summary**

#### SYSTEM

- Wide range of deployment and operation options
- On-premise or public or private cloud deployment
- Gateway, Microsoft and Google API connectors, Transparent, and Server Mode

Inbound and Outbound Inspection

- Support for multiple email domains with per-domain customization
- MSSP multi-tenant support with white label support
- Multi-tier administration
- IPv4 and IPv6 Address Support
- Virtual Hosting using Source and/or Destination IP Address Pools

SMTP Authentication Support via LDAP, RADIUS, POP3 and IMAP

LDAP-Based Email Routing

Per User Inspection using LDAP Attributes on a Per Policy (Domain) Basis

Geographic IP location-based policy

Comprehensive Webmail Interface for Server Mode Deployments and Quarantine Management

Mail Queue Management

Multiple Language Support for Webmail and Admin Interface

SMTP RFC Compliance

Modern HTML 5 GUI

Independently tested by SELabs, and Virus Bulletin

Compatibility with cloud services e.g. Microsoft 365, Google Workspace, Amazon AWS, and Microsoft Azure

DNS-based Authentication of Named Entities (DANE) support

#### ANTISPAM

FortiGuard Antispam Service

- Sender and domain reputation
- Spam and attachment signatures
   Dynamic heuristic rules
- Outbreak protection
- .....
- Full FortiGuard URL Category Filtering includes Spam, malware and phishing URLs
- Pornographic and adult URLs
- Newly registered domains

Greylisting for IPv4, IPv6 addresses and email accounts

Local sender reputation (IPv4, IPv6 and End Point ID-based)

Behavioral analysis

Integration with third-party spam URI and real-time blacklists (SURBL/RBL)

Newsletter (greymail) and suspicious newsletter detection

PDF Scanning and image analysis

Block/safe lists at global, domain, and user levels

- Support for enterprise sender identity standards
- Sender Policy Framework (SPF)
- Domain Keys Identified Mail (DKIM)
- Domain-Based Message Authentication (DMARC)

Flexible action and notification profiles

Multiple system and per-user self-service quarantines

#### TARGETED ATTACK PROTECTION

Content Disarm and Reconstruction

- Neutralize Office and PDF documents (remove macros, active content, attachments, and more)
- Neutralize email HTML content by removing hyperlinks / rewrite URLs
- Business Email Compromise (BEC)
- Multi-level anti-spoof protection
- Impersonation analysis manual and automatic address impersonation detection
- Cousin domain detection
- URL Click Protect to rewrite URLs and rescan on access

Integration with Fortilsolator Browser Isolation platform to neutralize browser-based threats

#### API INTEGRATION

- Microsoft 365 and Google Gsuite Email Integration
- Post-delivery threat clawback
- Scheduled scan – Real-time scanning
- Internal mail scanning

#### CONTENT DETECTION

- FortiGuard Antivirus Service detection
- CPRL signature checking
- Heuristic based behavioral detection
   Grevware detection
- FortiGuard Virus Outbreak Protection Service
- Global threat intelligence and data analytics
- Active content detection (PDF & Office Documents)

Rescan for threats on quarantine release

Custom file hash checking

#### Mime and file type detection

Comprehensive data-loss prevention with file fingerprinting and sensitive data detection – Automatic Windows fileshare and manual upload file fingerprinting

**Data Sheet** 

8

- Healthcare, Finance, personally identifiable information and profanity detection

Automatic decryption of Archives, PDF and Office Documents using built-in and administrator-defined password lists and word detection within email body

PDF Scanning and image analysis

Dynamic Image Analysis Service

- Identify and report on illicit and sexually explicit content

#### ENCRYPTION

Comprehensive encryption support

- Server to server TLS with granular ciphersuite control and optional enforcement
- S/MIME
- Clientless encryption to the recipient desktop using Identity Based Encryption (IBE)
- Optional Outlook plugin to trigger Identity Based Encryption (IBE)

#### MANAGEMENT, LOGGING, AND REPORTING

Basic/advanced management modes

Per domain, role-based administration accounts

Comprehensive activity, configurations change and incident logging and reporting

Built-in reporting module

Detailed message tracking

Centralized quarantine for large scale deployments

Optional centralized logging and reporting with FortiAnalyzer

SNMP support using standard and private MIB with threshold-based traps

Local or external storage server support, including iSCSI devices

External Syslog support

Open REST API for configuration and management

#### HIGH AVAILABILITY (HA)

ADVANCED

– Undo Send

SUPPORT

- High availability supported in all deployment scenarios
- Active-Passive mode
   Active-Active configuration synchronization mode

Link status, failover and redundant interface support

Policy-based e-mail archiving with remote storage options

SAML 2.0 SSO and ADFS integration for webmail and quarantine access

Quarantine and mail queue synchronization Device failure detection and notification

Support for Exchange journal archiving

Comprehensive webmail interface
 POP3, IMAP mail access

- Calendaring functions

Advanced RMA Support

Advanced Email Server feature set including

Simple support options with inclusive bundles

Professional services and installation support options

Certification

VBSpam and VB100 rated. Common Criteria evaluation in process (NIAP). NIST CMVP Implementation under test (FIPS140-3).

\* Recommended sizing for Gateway and Transparent deployments. For Server Mode, see Server Mode Mailbox metric.

If unsure, please validate the model selection by checking the peak mail flow rates and average message size detail with a FortiMail specialist.

\*\* FortiMail 7.0.1 has been validated on Nutanix AHV 20201105.2096 and AOS 5.20.1.1.

\*\*\* Transparent mode deployment is not fully supported on Microsoft HyperV and cloud hypervisors due to limitations in the available network configurations.

\*\*\*\* For the initial VM setup, 250GB is required to install the default Fortinet OVF file. After deployment, the default OVF file can be deleted and the disk space set no less than 50 GB.

\*\*\*\*\* Hardware dependent. Indicative figures based on a VMWare 6.0 system utilizing 2x Intel Xeon E5-2620 v4 @ 2.10 GHz restricted to the specified number of cores.

\*\*\*\*\*\* Protected Email Domains is the total number of email domains that can be configured on the appliance. Domain Associations can be used to enable additional domains which share configuration with the primary domain to which they are assigned. Advanced management license increases the protected domain limit by 50%.

# **Order Information**

For information on ordering, please talk with your Fortinet account manager, or refer to the Ordering Guide for a full list of FortiMail-related SKUs and pricing information.

ortiMail 2007         FML 2007         Email Security Appliance — 4x GE RJ45 ports, 1 TB storage           ortiMail 4007         FML-4007         Email Security Appliance — 4x GE RJ45 ports, 2x GE SFP slots, dual AC power supplies, 4 TB default storage           ortiMail 2007         FML-2007         Email Security Appliance — 4x GE RJ45 ports, 2x GE SFP slots, dual AC power supplies, 4 TB default storage           ortiMail 2007         FML-2007         Email Security Appliance — 4x GE RJ45 ports, 2x GE SFP slots, dual AC power supplies, 4 TB default storage           ortiMail 2007         FML-2007         Email Security Appliance — 4x GE RJ45 ports, 2x GE SFP slots, dual AC power supplies, 4 TB default storage           ortiMail 2007         FML-2007         Email Security Appliance — 4x GE RJ45 ports, 2x GE SFP slots, dual AC power supplies, 4 TB default storage           ortiMail VM0         FML-2007         Email Security Appliance — 4x GE RJ45 ports, 2x GE SFP slots, dual AC power supplies, 4 TB default storage           ortiMail VM0         FML-2001         FortiMail-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 2x vCPU cores           ortiMail VM0         FML-VM08         FortiMail-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 5x vCPU cores           ortiMail VM0         FML-VM08         FortiMail-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 5x vCPU cores								
ortiMail 400F         FML-400F         Email Security Appliance — 4x GE RJ45 ports, 2 TB storage           ortiMail 900F         FML-400F         Email Security Appliance — 4x GE RJ45 ports, 2x GE SFP slots, dual AC power supplies, 4 TB default storage           iortiMail 900F         FML-2000F         Email Security Appliance — 4x GE RJ45 ports, 2x GE SFP slots, dual AC power supplies, 4 TB default storage           iortiMail 900F         FML-2000F         Email Security Appliance — 4x GE RJ45 ports, 2x 10 GE SFP+ slots, dual AC power supplies, 4 TB default storage           iortiMail 700F         FML-VM01         FortiMail-VM vitual appliance for VMware ESX/ESX, Microsoft Hyper-V, Citrix XenServer and KVM vitualization platforms. 1x vCPU cores           iortiMail VM04         FML-VM02         FortiMail-VM vitual appliance for VMware ESX/ESX, Microsoft Hyper-V, Citrix XenServer and KVM vitualization platforms. 4x vCPU cores           iortiMail VM04         FML-VM02         FortiMail-VM vitual appliance for VMware ESX/ESX, Microsoft Hyper-V, Citrix XenServer and KVM vitualization platforms. 4x vCPU cores           iortiMail VM05         FML-VM08         FortiMail-VM vitual appliance for VMware ESX/ESX, Microsoft Hyper-V, Citrix XenServer and KVM vitualization platforms. 4x vCPU cores           iortiMail VM06         FML-VM18         FortiMail-VM vitual appliance for VMware ESX/ESX, Microsoft Hyper-V, Citrix XenServer and KVM vitualization platforms. 4x vCPU cores           iortiMail VM01         FML-VM18         FortiMail-VM vitual appliance for VMware ESX/ESX, Microsoft Hyper-V, Ci	FortiMail Product		•					
Full-900F         Full-900F         Email Security Appliance — 4x GE RJ4S ports, 2x GE SPP slots, dual AC power supplies, 4 TB default storage           fortiMail 3000F         FML-900F         Email Security Appliance — 4x GE RJ4S ports, 2x GE SPP slots, dual AC power supplies, 4 TB default storage           fortiMail 3000F         FML-900F         Email Security Appliance — 4x GE RJ4S ports, 2x GE SPP slots, dual AC power supplies, 4 TB default storage           fortiMail 3000F         FML-900F         Email Security Appliance — 4x GE RJ4S ports, 2x GE SPP slots, dual AC power supplies, 4 TB default storage           fortiMail 3000F         FML-900F         Email Security Appliance or VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 1x vCPU cores           fortiMail VM01         FML-VM02         FortiMail-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 8x vCPU cores           fortiMail VM02         FML-VM08         FortiMail-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 8x vCPU cores           fortiMail VM04         FML-VM08         FortiMail-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 8x vCPU cores           fortiMail VM04         FML-VM08         FortiMail-VM virtual appliance ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 32x vCPU cores           fortiMail VM04         SP-FML-900F         AC power supply for FML-4	FortiMail 200F							
FML-2000F         Email Security Appliance — 4x GE RJ4S ports, 2x GE SFP slots, dual AC power supplies, 4 TB default storage           FML-3000F         Email Security Appliance — 4x GE RJ4S ports, 2x GE SFP slots, dual AC power supplies, 4 TB default storage           FML-MINI         FML-MODE         Email Security Appliance — 4x GE RJ4S ports, 2x 10 GE SFP slots, dual AC power supplies, 4 TB default storage           FML-W01         FortiMail-VM virtual appliance for VMvare ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms, 1x vCPU cores           FML-W02         FortiMail-VM virtual appliance for VMvare ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms, 4x vCPU cores           FML-W04         FortiMail-VM virtual appliance for VMvare ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms, 8x vCPU cores           FML-W04         FortiMail-VM virtual appliance for VMvare ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms, 8x vCPU cores           FML-W03         FML-W04         FortiMail-VM virtual appliance for VMvare ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms, 8x vCPU cores           FML-M04         FML-W04         FortiMail-VM virtual appliance for VMvare ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms, 8x vCPU cores           FML-M04         FML-M04         FortiMail-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms, 8x vCPU cores           Vortual Xaphi	FortiMail 400F							
FML-3000F       FML-3000F       Email Security Appliance — 4x GE RJ45 ports, 2x 10 GE SFP+ slots, 4x 0 GA CP over supplies, 4 TB default storage         FortMail VM01       FML-VM01       FortIMail-VM virtual appliance for VMware ESX/ESX, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 1x vCPU cores         fortMail VM02       FML-VM03       FortIMail-VM virtual appliance for VMware ESX/ESX, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 2x vCPU cores         fortMail VM03       FML-VM04       FortIMail-VM virtual appliance for VMware ESX/ESX, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 8x vCPU cores         fortMail VM04       FML-VM05       FortIMail-VM virtual appliance for VMware ESX/ESX, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 8x vCPU cores         fortMail VM32       FML-VM06       FortIMail-VM virtual appliance for VMware ESX/ESX, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 8x vCPU cores         fortMail VM32       FML-VM06       FortIMail-VM virtual appliance for VMware ESX/ESX, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 8x vCPU cores         fortMail VM32       FML-VM06       FortIMail-VM virtual appliance for VMware ESX/ESX, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 8x vCPU cores         fortMail VM32       FML-VM06       FortIMail-VM virtual appliance for VMware ESX/ESX, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 32x vCPU cores         fortMail VM32       SP-FAD700-PS	FortiMail 900F	FML-900F	Email Security Appliance — 4x GE RJ45 ports, 2x GE SFP slots, dual AC power supplies, 4 TB default storage					
contilial VM01       FML VM01       Fortilal-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 1x vCPU core         contilal VM02       FML-VM02       Fortilal-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 2x vCPU cores         contilal VM04       FML-VM04       Fortilal-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 4x vCPU cores         contilal VM05       FML-VM08       Fortilal-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 8x vCPU cores         contilal VM16       FML-VM08       Fortilal-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 8x vCPU cores         contilal VM16       FML-VM16       Fortilal-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 8x vCPU cores         contilal VM16       FML-VM18       Fortilal-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 32x vCPU cores         contilal VM16       FML-VM08       Fortilal-VM virtual appliance for VMware ESX/ESXI, Microsoft Hyper-V, Citrix XenServer and KVM virtualization platforms. 32x vCPU cores         contilal VM173       FML-VM08       AC power supply for FML-400F         contilal VM174       SP-FML200F-PS       AC power supply for FML-400F <t< th=""><th>FortiMail 2000F</th><th>FML-2000F</th><th>Email Security Appliance — 4x GE RJ45 ports, 2x GE SFP slots, dual AC power supplies, 4 TB default storage</th></t<>	FortiMail 2000F	FML-2000F	Email Security Appliance — 4x GE RJ45 ports, 2x GE SFP slots, dual AC power supplies, 4 TB default storage

#### Fortinet Corporate Social Responsibility Policy

Fortinet is committed to driving progress and sustainability for all through cybersecurity, with respect for human rights and ethical business practices, making possible a digital world you can always trust. You represent and warrant to Fortinet that you will not use Fortinet's products and services to engage in, or support in any way, violations or abuses of human rights, including those involving illegal censorship, surveillance, detention, or excessive use of force. Users of Fortinet products are required to comply with the Fortinet EULA and report any suspected violations of the EULA via the procedures outlined in the Fortinet Whistleblower Policy.
